

NetRiders Thailand 2011

In a keenly contested showdown over Cisco WebEx®, round 1 of the Thailand NetRiders 2011 took place on the 31st of March 2011, featuring 98 students across 6 different locations throughout Thailand. The top 20 teams were then selected to move forward to the final of the 2011 NetRiders competition on the 24th of April.

The winning team emerged from the Faculty of Information Technology - King Mongkut's Institute of Technology Ladkrabang, who will be attending the APAC NetRiders event in October 2011.

Thailand NetRiders competition also combined a career fair seminar for the students, where students had the opportunity to meet with a recruitment firm whom helped them to prepare for job interviews and designing their resumes.
